Caroma® Integra Urinal

Vitreous China Wall-Hung Boxed Rim

A wall hung urinal of modern design with concealed integral trap and bracketing to provide a smooth easy to clean outer shroud for low cost maintenance. A unique feature of this urinal is the integral air break system for **direct** mains pressure connection. The box rim flush provides for the wash down of the entire inside area of the bowl on each flush. The grate is vitreous china and factory fitted.

Integra urinal Code No.665102W.

- Inlet:** Back inlet with concealed sparge pipe and compression rubber fitting.
- Outlet:** Two rubber connection seals are provided for a push on connection with either 50mm on brass tube and 50mm I.D. PVC Waste Pipe tube.
- Flush Action:** Box rim.
- Cistern:** Caroma concealed cistern options available – **Invisi** 1.8 litre Inwall/Induct/Inceiling for 1 stall 3 star installation, conversion to 4 litre max for 2 stall 1 star installation or 6 litre max for 3 stall 0 star installation. For button options see Section 6. **Invisi II** Inwall/Induct/Inceiling (available November 2008), see Section 6.
- Flushvalves:** Integral air break allows for direct connection with mains pressure flushvalves and electronically activated valves.
- Fixing:** The Integra urinal is fixed to the wall with the **D.775 Concealed Bracket** Code No.687130; also suitable for installation with the **D.780 Sanifix Bracket** Code No.687780 and **fixing pack** Code No.687810.
- Colours:** White only.
- Dimensions:** All dimensions are in millimetres and are subject to normal manufacturing variations. Caroma pursues a policy of continuing improvement in design and performance of its products. The right is therefore reserved to vary specifications without notice.
