SEDIMENT REMOVAL CARTRIDGE

Extruded Carbon Cartridges / Coconut Carbon Cartridges

The Puretec Basic EC Series cartridges can be used with many liquids and are very effective for chlorine, odour and taste removal. Cyst, lead, heavy metal, high turbidity and sulphur removal models are also available.

The high porosity design helps prevent the cartridge from plugging before its absorption capacity is exhausted, maximising the utilisation of the carbon while minimising pressure drop.

Puretec Basic EC Series cartridges are manufactured entirely from NSF 42 Certified Materials making them an ideal choice for a wide range of residential, food service, commercial and industrial applications. This cartridge is Gold Seal Certified for material safety and ISO 9001:2030 standard verified.
